EXAMINER

SHERR, CRISTINA O

ART UNIT

PAPER NUMBER

3621

DATE MAILED: 08/23/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	09/836,631	HUGHES ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	Cristina Owen Sherr	3621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 09 May 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-28 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-28 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

1. This communication is in response to the applicant's amendment filed May 9, 2005. Claims 1-28 are pending in this case.

***Response to Arguments***

2. Applicant's arguments with respect to claims 1-28 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fritsch (US 6,233,682) in view of Giobbi (US 2002/0080969).

5. Regarding claim 1 –

Fritsch discloses a method of facilitating a transaction for downloadable digital data over an electronic network, the method comprising: maintaining a presence on the electronic network to which a consumer may connect; transmitting a page from the presence to the consumer over the electronic network, the page including information concerning the downloadable digital data; receiving a command from the consumer over the electronic network indicating that the consumer wishes the transaction for the downloadable digital data (e.g. Figure 1 A-E).

Art Unit: 3621

6. Fritsch does not disclose, but Giobbi does, transmitting format options from the presence to the consumer over the electronic network via the page, the format options being selectable by the consumer and including at least one of (i) types of software on which the downloadable digital data may be executed; (ii) types of portable devices on which the downloadable digital data may be stored; (iii) types of compression formats in which the downloadable digital data may be configured; (iv) types of CODECs through which the downloadable digital data may be processed; and (v) types of digital rights management algorithms to which the downloadable digital data may be subject (e.g. fig. 4).

7. It would be obvious to one of ordinary skill in the art to combine the teachings of Fritsch and Giobbi in order to obtain greater ease and security in data transaction.

8. Regarding claim 2 –

Giobbi discloses the method of claim 1, wherein at least one of (i) a given type of software is compatible with respective subsets of at least one of the types of compression formats, the types of digital rights management algorithms, and the types of portable devices; (ii) a given type of compression format is compatible with respective subsets of at least one of the types of software, the types of digital rights management algorithms, and the types of portable devices; (iii) a given type of digital rights management algorithm is compatible with respective subsets of at least one of the types of software, the types of compression formats, and the types of portable devices; and (iv) a given type of portable device is compatible with respective subsets of at least one

Art Unit: 3621

of the types of software, the types of compression formats, and the types of digital rights management algorithms (e.g. fig. 4).

9. Regarding claim 3 –

Giobbi discloses the method of claim 2, further comprising permitting selection by the consumer from among only the compatible respective subsets of at least one of the types of compression formats, the types of digital rights management algorithms, and the types of portable devices, when the given type of software is selected by the consumer (e.g. Par. 0029).

10. Regarding claim 4 –

Giobbi discloses the method of claim 2, further comprising permitting selection by the consumer from among only the compatible respective subsets of at least one of the types of software, the types of digital rights management algorithms, and the types of portable devices, when the given type of compression format is selected by the consumer (e.g. Par 0029).

11. Regarding claim 5 –

Fritsch discloses the method of claim 2, further comprising permitting selection by the consumer from among only the compatible respective subsets of at least one of the types of software, the types of compression formats, and the types of portable devices, when the given type of digital rights management algorithm is selected by the consumer (e.g. Figure 1D).

12. Regarding claim 6 –

Art Unit: 3621

Giobbi discloses the method of claim 2, further comprising permitting selection by the consumer from among only the compatible respective subsets of at least one of the types of software, the types of compression formats, and the types of digital rights management algorithms, when the given type of portable device is selected by the consumer (e.g. Figure 4).

13. Regarding claim 7 –

Giobbi discloses the method of claim 1, wherein the downloadable digital data includes at least one of audio data, video data, and text data (e.g. Figure 4).

14. Regarding claim 8 –

Giobbi discloses the method of claim 1, wherein each type of software, each type of compression format, each type of digital rights management algorithm, and each type of portable device is displayed on the page and selectable by way of activation by the consumer (e.g. par 29).

15. Regarding claim 9 –

Fritsch discloses the method of claim 8, further comprising receiving the consumer's selection of at least one of the type of software, the type of compression format, the type of digital rights management algorithm, and the type of portable device, over the electronic network at the presence (e.g. col 1 ln 30-65).

16. Regarding claim 10 –

Fritsch discloses the method of claim 9, further comprising transmitting the downloadable digital data to the consumer over the electronic network in a format consistent with at least one of the selected type of software, the selected type of

Art Unit: 3621

compression format, the selected type of digital rights management algorithm, and the selected type of portable device (e.g. Figure 1D).

17. Regarding claim 11 –

Fritsch discloses the method of claim 10, further comprising storing at least one of the selected type of software, the selected type of compression format, the selected type of digital rights management algorithm, and the selected type of portable device (e.g. Figure 1D).

18. Regarding claim 12 –

Fritsch discloses the method of claim 11, further comprising designating the stored type of software, type of compression format, type of digital rights management algorithm, and type of portable device as default format options and transmitting the default format options from the presence to the consumer over the electronic network via the page in response to another command from the consumer over the electronic network indicating that the consumer wishes another transaction for downloadable digital data (e.g. col 1 ln 30-65).

19. Regarding claim 13 –

Fritsch discloses the method of claim 1, wherein the portable devices on which the downloadable digital data may be stored are compliant with secure digital music initiative (SDMI) specifications (e.g. col 1 ln 30-65).

20. Regarding claim 14 –

Fritsch discloses the method of claim 1, wherein the electronic network is the Internet and the presence is a web site thereon (e.g. col 3 ln 5-40).

21. Regarding claim 15 –

Fritsch discloses a system for facilitating a transaction for downloadable digital data over an electronic network, comprising: means for maintaining a presence on the electronic network to which a consumer may connect; means for transmitting a page from the presence to the consumer over the electronic network, the page including information concerning the downloadable digital data; means for receiving a command from the consumer over the electronic network indicating that the consumer wishes the transaction for the downloadable digital data (e.g. col 1 ln 30-65).

22. Fritsch does not disclose, but Giobbi does, transmitting format options from the presence to the consumer over the electronic network via the page, the format options being selectable by the consumer and including at least one of (i) types of software on which the downloadable digital data may be executed; (ii) types of portable devices on which the downloadable digital data may be stored; (iii) types of compression formats in which the downloadable digital data may be configured; (iv) types of CODECs through which the downloadable digital data may be processed; and (v) types of digital rights management algorithms to which the downloadable digital data may be subject (e.g. fig. 4).

23. It would be obvious to one of ordinary skill in the art to combine the teachings of Fritsch and Giobbi in order to obtain greater ease and security in data transaction.

24. Regarding claim 16 –

Giobbi discloses the system of claim 15, wherein at least one of (i) a given type of software is compatible with respective subsets of at least one of the types of

compression formats, the types of digital rights management algorithms, and the types of portable devices; (ii) a given type of compression format is compatible with respective subsets of at least one of the types of software, the types of digital rights management algorithms, and the types of portable devices; (iii) a given type of digital rights management algorithm is compatible with respective subsets of at least one of the types of software, the types of compression formats, and the types of portable devices; and (iv) a given type of portable device is compatible with respective subsets of at least one of the types of software, the types of compression formats, and the types of digital rights management algorithms (e.g. fig 4).

25. Regarding claim 17 –

Giobbi discloses the system of claim 15, wherein the downloadable digital data includes at least one of audio data, video data, and text data (e.g. Figure 4).

26. Regarding claim 18 –

Giobbi discloses the system of claim 15, wherein each type of software, each type of compression format, each type of digital rights management algorithm, and each type of portable device is displayed on the page and selectable by way of activation by the consumer (e.g. Par 0029).

27. Regarding claim 19 –

Fritsch discloses the system of claim 15, further comprising means for transmitting the downloadable digital data to the consumer over the electronic network in a format consistent with at least one of the selected type of software, the selected type of

Art Unit: 3621

compression format, the selected type of digital rights management algorithm, and the selected type of portable device (e.g. Figure 1 A-D).

28. Regarding claim 20 –

Giobbi discloses the system of claim 15, wherein the portable devices on which the downloadable digital data may be stored are compliant with secure digital music initiative (SDMI) specifications (e.g. Par 0029).

29. Regarding claim 21 –

Fritsch discloses the system of claim 15, wherein the electronic network is the Internet and the presence is a web site thereon (e.g. col 3 ln 5-40).

30. Regarding claim 22 –

Fritsch discloses an electronic storage medium for storing instructions which, when executed by a programmable controller, carry out a method for facilitating a transaction for downloadable digital data over an electronic network, comprising: maintaining a presence on the electronic network to which a consumer may connect; transmitting a page from the presence to the consumer over the electronic network, the page including information concerning the downloadable digital data; receiving a command from the consumer over the electronic network indicating that the consumer wishes the transaction for the downloadable digital data (e.g. col 1 ln 30-65).

31. Fritsch does not disclose, but Giobbi does, transmitting format options from the presence to the consumer over the electronic network via the page, the format options being selectable by the consumer and including at least one of (i) types of software on which the downloadable digital data may be executed; (ii) types of portable devices on

Art Unit: 3621

which the downloadable digital data may be stored; (iii) types of compression formats in which the downloadable digital data may be configured; (iv) types of CODECs through which the downloadable digital data may be processed; and (v) types of digital rights management algorithms to which the downloadable digital data may be subject (e.g. fig. 4).

32. It would be obvious to one of ordinary skill in the art to combine the teachings of Fritsch and Giobbi in order to obtain greater ease and security in data transaction.

33. Regarding claim 23 –

Giobbi discloses the electronic storage medium of claim 22, wherein at least one of (i) a given type of software is compatible with respective subsets of at least one of the types of compression formats, the types of digital rights management algorithms, and the types of portable devices; (ii) a given type of compression format is compatible with respective subsets of at least one of the types of software, the types of digital rights management algorithms, and the types of portable devices; (iii) a given type of digital rights management algorithm is compatible with respective subsets of at least one of the types of software, the types of compression formats, and the types of portable devices; and (iv) a given type of portable device is compatible with respective subsets of at least one of the types of software, the types of compression formats, and the types of digital rights management algorithms (e.g. Par 0029).

34. Regarding claim 24 –

Art Unit: 3621

Giobbi discloses the electronic storage medium of claim 22, wherein the downloadable digital data includes at least one of audio data, video data, and text data (e.g. Par 0029).

35. Regarding claim 25 –

Fritsch discloses the electronic storage medium of claim 22, wherein each type of software, each type of compression format, each type of digital rights management algorithm, and each type of portable device is displayed on the page and selectable by way of activation by the consumer (e.g. Figure 1D).

36. Regarding claim 26 –

Fritsch discloses the electronic storage medium of claim 22, further comprising means for transmitting the downloadable digital data to the consumer over the electronic network in a format consistent with at least one of the selected type of software, the selected type of compression format, the selected type of digital rights management algorithm, and the selected type of portable device (e.g. Figure 1A-D).

37. Regarding claim 27 –

Giobbi discloses the electronic storage medium of claim 22, wherein the portable devices on which the downloadable digital data may be stored are compliant with secure digital music initiative (SDMI) specifications (e.g. fig. 4).

38. Regarding claim 28 –

Fritsch discloses the electronic storage medium of claim 22, wherein the electronic network is the Internet and the presence is a web site thereon (e.g. col 3 ln 5-40).

Art Unit: 3621

39. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant.

Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.

### ***Conclusion***

40. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

41. [www.digitalriver.com](http://www.digitalriver.com) discloses a method for facilitating a transaction for purchasable content over an electronic network.

42. Dwek (US 6,248,946) discloses a multimedia content delivery method and system.

43. Giobbi (US 2004/0255139) discloses a digital content security system.

44. Jones et al (US 6,697,944) disclose a digital content distribution, transmission and protection system and method, and portable device for use therewith.

45. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cristina Owen Sherr whose telephone number is 571-272-6711. The examiner can normally be reached on 8:30-5:00 Monday through Friday.

46. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

47. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
